OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Explanation of Project and Objective
- Methodology Description
 - Collecting Data
 - Analyzing Data
 - Visualising Data
- Presentation of Key Results
- Discussion of Findings
- Final Conclusion of the Research

INTRODUCTION

- Stack Overflow's annual Developer Survey is the largest and most comprehensive survey that aims to measure trends of technical tools.
- Over 90K developers.
- Aim of the project is to analyse trend of the technical tools.
- Two objective of this project:
 - See the next trends.
 - Detect profile of developers.

METHODOLOGY

- Collect Data
 - Web Scraping
 - APIs
- Data Wrangling
 - Clean Data
- Exploratory Data Analysis
 - Distribution Analysis
 - Handling Outliers
 - Finding Correlations
- Data Visualization
 - Create Dashboards
 - Highlight Findings

RESULTS

Top 10 Language

PROGRAMMING LANGUAGE TRENDS – FINDINGS & IMPLICATIONS

Findings

- JavaScript and HTML/CSS keep leading position.
- Python and TypeScript is getting importance.
- Some languages lost their popularity meanwhile another languages such as Go gain popularity.

Implications

- Possible for developers to learn new languages.
- Shifting used languages.

DATABASE TRENDS

Current Year

Top 10 Database

Top 10 Database

DATABASE TRENDS – FINDINGS & IMPLICATIONS

Findings

- Using database management system is not stable.
- MySQL lost its popularity meanwhile PostgreSQL took its place.
- Oracle was not popular anymore, dynamoDB gained popularity.

Implications

- Good to know more than one database management system.
- Follow-up trends are important.

Formal Education Level by Gender

DISCUSSION

OVERALL FINDINGS & IMPLICATIONS

Findings

- Men are more interested in technology than women. Developers are generally located in developed countries.
- JavaScript is most popular language and Type Script is starting to be popular.
- Database management system is not stable.

Implications

- Developers are polarized by geography and gender.
- Language trend is changing, good to learn new trends.
- Trends in databases are changing quickly, and we need to adapt at the same speed.

CONCLUSION

- Accurate trends in database and language can be obtained.
- There is a direct proportion between developed countries and where most developers live.
- Technology and tools shift and change quickly.
